PROFILE

M.Sc. Computer Science student at TU Dresden with 2+ years of industry experience in Python automation, Generative AI / LLM evaluation, and end-to-end test automation (Selenium, Cypress). Seeking a working student (Werkstudent) position in software development, AI/ML, or test automation. Available up to 20 h/week during the lecture period and full-time during semester breaks.

WORK EXPERIENCE

Software Developer

Jul. 2023 – Sep. 2025

Genpact

Bangalore, India

- Built a Generative AI test-automation suite that generates test cases, scripts, and end-to-end test scenarios directly from a GitHub repository and Jira project link – up to 100 test cases per repository.
- Made test-case generation and validation 90% faster than manual work by automatically evaluating LLM outputs for relevance, traceability, and quality.
- Extended the suite with Selenium checks that verify page elements and core user flows whenever the target project includes a web front end.
- Developed an enterprise-scale financial document automation framework for a healthcare client, processing 500–1,000 credit memos per week with Python, GCP, and Apache Airflow and cutting manual effort by 75%.
- Handled data preparation and curation of a large-scale evaluation dataset for systematic language-model testing, covering complete real-world codebases such as a fully fledged banking application.

Software Developer Intern

Mar. 2023 – Jul. 2023

Genpact

Bangalore, India

- Developed a full-stack banking application with React.js, Node.js, and MongoDB.
- Implemented real-time transaction tracking and monthly statement generation capabilities.

EDUCATION

Technische Universität Dresden

Dresden, Germany

Master of Science in Computer Science

Oct. 2025 – Oct. 2027 (expected)

R V Institute of Technology and Management

Bangalore, India

Bachelor of Engineering in Computer Science and Engineering

Sep. 2019 – Jul. 2023

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, C++, SQL, Solidity

AI & Generative AI: Machine Learning, LLM-based Workflows, LLM Evaluation, Natural Language Processing, PyTorch, Retrieval-based Methods

Testing & Automation: Selenium (E2E Testing), Cypress (E2E Automation), Automated Test Workflows, Agile Testing

Web & Backend: React.js, React Native, Node.js, Express.js, MongoDB, Mongoose, MySQL, PHP, WordPress

Tools & Concepts: Git, Linux, GCP, Apache Airflow, Jira, Object-Oriented Programming, Software Testing, E2E Testing

PROJECTS

FarmiLedger (Bachelor Thesis) | *Solidity, React.js, Node.js, MongoDB, Ethereum*

- Developed a blockchain-based bidding platform to address unfair crop pricing through transparent, decentralized transactions.
- Designed smart contracts and integrated on-chain storage with a MERN-stack web application.

House of Friends (Mobile Application) | *React Native, Express.js, MongoDB*

- Built a social networking app enabling private group-based chat with secure authentication.
- Implemented responsive UI components and backend APIs for real-time interaction.

CERTIFICATIONS

Google Cloud Platform Associate Cloud Engineer

Generative AI Engineering – Databricks

PUBLICATIONS

Blockchain Bidding System for Selling Agricultural Produce. International Conference on Advanced Materials Science and Nanotechnology (ICAMSNT), 2023.
